Please be patient with us as we make the transition from paper health records to electronic health records (EHR). As a patient, you may observe differences in the manner by which medical information is recorded, but please know that your health and privacy remain our top priorities.

The implementation of our EHR system will benefit all of us with improved accuracy, care coordination and convenience. As a patient, you can expect some of the following:

- Quicker access to medical records
- Reduced time waiting for medication refills
- Easier chronic disease management
- Quicker and remote access to patient information for providers

If you have any questions or concerns about our transition to EHR, please don’t hesitate to talk with any member of our Central Iowa Healthcare staff.

And as always, thank you for choosing Central Iowa Healthcare for your medical needs.
